

Assessment Cover Sheet

Assessment Title	Book Review Platform		
Assessment Type	Uncontrolled	Group	Not must-pass
Due Date	02-June-2026	Course Code	IT8415
Course Title	Database Programming 2		
Internal Moderator's Name	Ms. Ruqaya Yusuf		
External Examiner's Name			

Instructions:

1. This cover sheet must be completed (section in blue below) and attached to your assessment before submission in hard copy/soft copy.
2. The time allowed for this assessment is 7 weeks
3. This assessment carries 30% marks distributed to a total of 3 tasks assessing CILO 1, 2, 3, and 4.
4. The materials allowed for use in this assessment are Moodle Resources, Lab Manuals, Lab Solutions, and Online Sources.
5. The **use of generative AI tools is strictly prohibited.**
6. References consulted (if any) must be properly acknowledged and cited.
7. The assessment has a total of 20 pages.

Learner ID	202201323	Date Submitted	
Learner Name	Yusuf Mahdi		
Programme Code	ICT8010 (Programming Major), ICT8040 (Database Major)		
Programme Title	Bachelor of Information and Communications Technology		
Lecturer's Name			

By submitting this assessment for marking, I affirm that this assessment is my own work.

Learner Signature	
-------------------	--

Do not write beyond this line. For assessor use only.

Assessor's Name			
Marking Date		Maks Obtained

IT8415 – Database Programming 2

Book Review Platform – Group 6

Semester B, 2025-2026 | Submission: 02 June 2026

Group Members

Group	Full Name	Student ID
Group 6	Maha Hafeez Abdulhafeez Gul Mohammad Qaim Din	202200228
Group 6	Komail Husain Mohamed Jasim Ali Hasan	202300533
Group 6	Yusuf Saeed Mahdi Abdulla Mahdi	202201323
Group 6	Zahra Fadhel Radhi Fadhul Mohamed	202305346

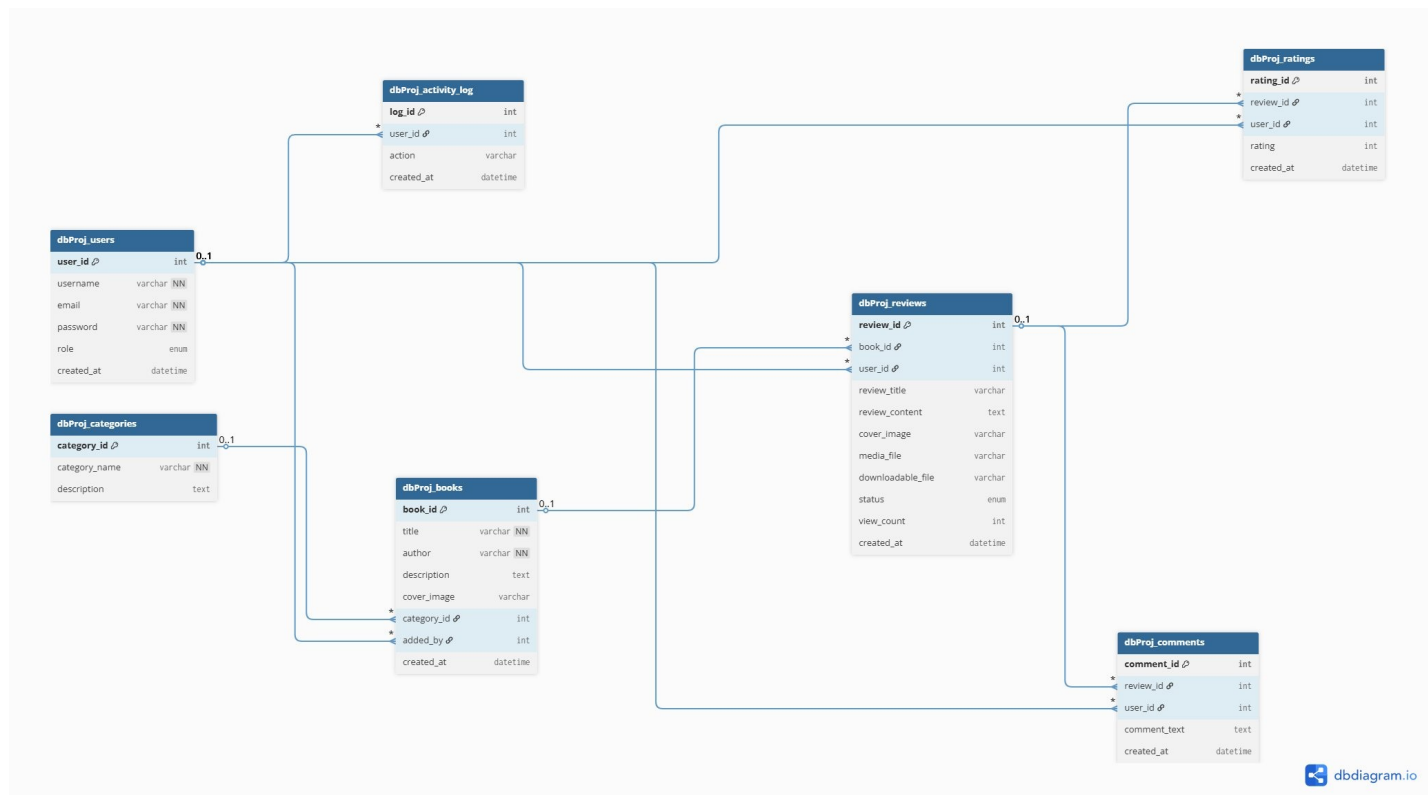

1. Testing Accounts

Role	Username	Password	Access Level
Admin	admin	admin123	Full system access
Creator	sara_reads	pass123	Create & manage reviews
Creator	ahmed_books	pass123	Create & manage reviews
Viewer	viewer1	pass123	Browse, rate & comment
Viewer	viewer2	pass123	Browse, rate & comment

2. Entity Relationship Diagram (ERD)

The ERD screenshot (ERD.png) is included in the project ZIP file alongside this document.

S1-G6 ERD

Database tables (prefix: dbProj_):

1. dbProj_users — user accounts and roles (admin, creator, viewer)
2. dbProj_categories — book genres and categories
3. dbProj_books — book information
4. dbProj_reviews — review content and publishing status
5. dbProj_ratings — star ratings per user per review
6. dbProj_comments — user comments on reviews
7. dbProj_activity_log — trigger-generated activity records

3. GitHub Repository

<https://github.com/yusuf-mahdi/IT8415-S1-G6>

The repository is public and contains all project files, SQL scripts, and full commit history.

4. Advanced Features

4.1 AJAX Comments

Comments are submitted and displayed without page reload using JavaScript fetch requests. When a user posts a comment, it is sent asynchronously to the server, saved to the database, and the response is appended to the comments section dynamically. This improves user experience by avoiding full page refreshes.

File: assets/js/ajax-comments.js

4.2 Database Triggers

A trigger (dbProj_AfterRatingInsert) fires automatically after each new rating is inserted. It logs the user ID, review ID, and timestamp into the dbProj_activity_log table without requiring any additional PHP code. The activity log is viewable by administrators in the System Activity Logs page.

4.3 Prepared Statements

All database queries use PHP PDO prepared statements throughout the application. User input is bound separately from SQL queries to prevent SQL injection attacks. This applies to login, signup, search, review creation, ratings, and all CRUD operations.

4.4 Full-Text Search

MySQL FULLTEXT indexes are applied to the dbProj_books and dbProj_reviews tables. This enables relevance-based keyword searching across book titles, authors, and review content. The search also supports filtering by date range, creator username, and sorting by newest, most views, or highest rating.

5. Test Plan

The complete Test Plan is included as a separate PDF: Task5IT8415.pdf

It covers:

8. Home page and review listing
9. Search and filtering (keyword, date, creator, popularity)
10. User registration and login with validation
11. Rating and comment system
12. Creator dashboard — add, edit, publish reviews
13. Admin dashboard — manage users, content, comments
14. Popular reviews report and user content report
15. System activity logs (database triggers)
16. AJAX comments and full-text search

Each test case includes: purpose, steps, expected output, and screenshot evidence.
